SUMMARY

I am a Software Engineer skilled in both frontend and backend development. I build modern web and mobile apps using React.js, React Native, Node.js, and MongoDB. I enjoy solving problems and improving user experiences and backend systems to create fast and reliable software. I am always eager to learn new technologies and take on challenging projects.

EXPERIENCE

Software Engineer
SAYLANI WELFARE TRUST

📅 01/2025 - Present   📍 Karachi, Pakistan

Web application Developments

- Worked on full-stack development for projects like the Alumni App and Saylani Quiz App, handling both frontend and backend tasks.
- Participated in daily standups, managed tasks, and ensured smooth project progress.
- Handled GitHub workflows including version control and code reviews.
- Improved UI/UX for better user experience across applications.
- Developed and optimized backend systems for performance and reliability.
- Provided regular updates and reports to stakeholders.
- Managed deployment, performance tuning, and system maintenance for live applications.

Intern Software Engineer
AFROZE TEXTILE

📅 06/2024 - 08/2024   📍 Karachi, Pakistan

Textile Manufacturing Sector

- Supported the IT team by troubleshooting network issues, setting up hardware, and ensuring smooth IT operations.
- Learned key concepts like resource management, troubleshooting, and optimizing performance in an on-premises environment.
- Gained hands-on experience in managing physical servers, networks, and systems

EDUCATION

Bachelor of Computer Science
SZABIST University

📅 01/2021 - 06/2025

Modern Web Application
SMIT Karachi

📅 09/2024 - Present

AWS Cloud
SHERDIL IT Karachi

📅 05/2024 - 09/2024

KEY ACHIEVEMENTS

🎗 **Award-Winning FYP — TaskMate App & Portal**

Recognized for excellence in design and development with an award for building the TaskMate mobile app, web portal, and website, delivering a seamless user experience across platforms.

💡 **Key Contributor — Saylani Live Portal**

Contributed significantly to the development and enhancement of the live Legacy of Saylani portal, improving features, system stability, and overall user experience in a production setting.

SKILLS

React Native   React JS   Next JS

Github   Tailwind   MongoDB   Express JS

Node JS   TypeScript   Prisma   PostgreSQL

Docker   RESTful APIs   Project Management

Jira   Leadership   Mobile App   Azure

Terraform   Python   Automation   SRS

Data Analysis   Chatbots   Web Scraping

PROJECTS

AI-Powered Railway ChatBot

📅 05/2025 - 06/2025

Web Based chatbot for client.

- Built an AI-powered chatbot using Gemini NLP and Selenium to scrape real-time data from dynamic UK railway websites. Integrated with a full-stack app (React, Node.js, Python, MongoDB) to deliver live railway information through an interactive chat interface.

Taskmate

📅 09/2024 - 05/2025

A mobile application project for final year

- Developed TaskMate, a cross-platform mobile application that connects service providers with clients for task assignments.
- Key features include task tracking, real-time messaging, push notifications, multi-stakeholder support, interactive UI, and comprehensive user management — designed to streamline service coordination and enhance user experience.
